

PRESS RELEASE

Subject: Aerospace range

18 JUNE 2007

Press relations - H&B Communication:

Marie-Caroline SARO – Christiane DECERLE

Tel. 01 58 18 32 44 / 56 – mc.saro@hbcommunication.fr

DAHER Group: Hubert CLEMENT

Tel. 01 49 75 98 13 – h.clement@daher.com

On the occasion of the Paris Air Show

DAHER, aerospace equipment manufacturer, presents its three main product lines:

Aerostructures, Cabin comfort and Services

With a turnover of 450 million Euros in 2006, DAHER has seen strong growth over the last few years, particularly for its aerospace activity which now employs over 3000 people based on twenty sites including nine plants.

Through its global offering characterised by a dual industrial and service culture, DAHER is one of the few aerospace equipment manufacturers to offer constructors and equipment manufacturers a complete range of products and services, including logistics management of their own industrial sites and installation of their equipment on aircraft.

DAHER's pioneering approach, based on convergence between industry and services, plays a role in the spirit of partnership of increasing importance to industrial groups. The group offers its skills and expertise to the Aerospace sector through three product lines: **aerostructures** (composites and metal/composite hybrids), **cabin comfort** (fluid distribution systems, temperature and sound insulation) and **services** (transport, logistics, assembly and installation).

1- Aerostructures: structural aerospace parts made of metal, composites and hybrids

With strong expertise in composites and metals, DAHER is establishing itself as a key partner for aerostructure products and contributes to all types of structure: aerodynamic covers, mobile aerodynamic elements, firewalls and structural parts. DAHER designs, develops and produces all types of structural assemblies made of composite materials, special alloys, or using mixed solutions, underlining its role as equipment manufacturer.

2- Cabin comfort: temperature and sound insulation AND fluid distribution system (high temperature, high and low pressure)

DAHER is the leading European manufacturer of low pressure air distribution systems. The group also brings all its system design skills to other assemblies such as high pressure fluid distribution: air, oxygen, fuel, hydraulics and water. To meet the various requirements of fluid distribution, DAHER manufactures its products in special steels or composite materials.

In addition, DAHER designs, manufactures and installs temperature and sound insulation blankets for various aircraft sections. Thanks to its R&D teams, DAHER has exceeded European regulatory requirements by including mica in its manufacturing process. Blankets, in addition to offering temperature and sound insulation, now also act as a fire barrier.

3- Services: transport, logistics, assembly and installation

Finally, with regard to services, DAHER gets involved at the very heart of the design of customer processes and is able to offer innovative, tailor made solutions, integrating additional services on-site or at DAHER facilities (installation, finishing and customer support). Its technological skills and service quality make DAHER the recognised partner of the biggest players in the aerospace industry.

DAHER is committed to working together with all European aircraft manufacturers, offering them the full breadth of its expertise, from the idea to the final product (design, development, industrialisation, manufacturing, installation and customer support). DAHER is already a partner of major manufacturers including AIRBUS, EUROCOPTER, DASSAULT and BOMBARDIER.... involved in numerous programmes.

Supply chain monitoring: DAHER offers full or partial supervision of the logistics chain on behalf of its customers.

Aircraft activities, assembly and installation: DAHER directly integrates its customers' specific industrial processes (component assembly and installation on aircraft, finishing operations, etc.).

Logistics services: DAHER manages dedicated or pooled hubs, on or off site, in France or abroad.

Transport organiser: DAHER uses standard (air, sea, road), specialised and exceptional transport both within Europe and worldwide (*specialised transport, exceptional transport – heavy or oversized lifts – customs engineering*).

For further information on DAHER – www.daher.com

DAHER is an equipment manufacturer that designs and produces equipment and services for highly technological industries. Specialised in global solutions that include industrial manufacturing and services, DAHER works in particular with the Aerospace, Defence, Nuclear and Automotive sectors.

Founded in 1863, DAHER is an exclusively family-run, independent international group, with nearly 5000 employees and 12 international installations (4 in Western Europe, 3 in Eastern Europe, 2 in North America, 2 in Africa and 1 in Australia). In 2006, DAHER hit a turnover of 450 million Euros, representing an average annual growth of 15% over the last three years, and forecasts a turnover of around 550 million Euros for 2007.
