**On the occasion of the GEPAR EXPO show**  
**The International Show for the Management of High Risk Products**  
(June 19-21, 2007, Convention Centre, Lyon)

**DAHER presents its expertise in the nuclear  
and chemical product markets**

Positioned at the boundary between industry and services and with a turnover of 450 million euros in 2006, DAHER can draw upon extensive resources, all sharing many common features in terms of industrial culture, process and expertise. DAHER brings with it all the qualities of an industrial partner and applies its engineering skills to develop new products and services.

Its "**density of expertise**" in the management of high risk products makes DAHER a benchmark in the field, with a particular focus on the nuclear and chemical industries.

**Nuclear: a global offer for the transportation of low-level and very low-level waste**

With longstanding experience in handling sensitive freight, DAHER provides engineering services (studies and design) and executes the transportation of radioactive and nuclear materials. The group serves a full spectrum of participants in the nuclear industry, including research institutions, the complete fuel cycle industry and the industrial users in energy, defence and medical sectors. Familiar with all applicable national standards, our experienced teams of engineers and technicians are able to operate anywhere in the world.

DAHER offers its industrial customers a fleet of high security equipment and facilities (mobile facilities, equipment and packaging) and its groundbreaking expertise in conventional and exceptional multi-modal transport.

Moreover, together with its subsidiaries, DAHER possesses national regulatory transport authorizations as well as the following certifications and qualifications: Iso 9001, version 2000, NTAQ (EDF qualification), KTA 1401 (German standard) and CEFRI (French radiological protection standard).

DAHER can notably rely upon NCS, a company acquired by the group in January 2007, as a European platform to develop its activities in the nuclear and heavy lift domain.

**DAHER's offer for the chemical industry:**

- *Engineering and services*

In response to demand from many companies in the chemical industry, DAHER designs and creates storage, handling and transport equipment and services.

Thanks to its own industrial experience and with its own incorporated design office, DAHER deploys a whole range of specific services directly tailored to each individual demand.

- *Tank container operator*

DAHER designs and produces all types of containers, including isotanks which it rents to industrial groups, together with a global offer that features tracking and maintenance of the fleets of containers, on-site assistance for loading and discharge, customs clearance operations for import/export, as well as multimodal transport to ship products “door-to-door” from the production sites to the destination industrial sites.

DAHER also offers its know-how in international ocean freight for containerized bulk liquids and gases. Supported by a network of agents specialized in chemicals, DAHER proposes a global transport offer taking into account all of the product constraints imposed by international regulations.

- *Conditioned chemical products*

DAHER's expertise includes the organization and international transport of conditioned chemicals. With preferential maritime freight terms granted to its EURTEAM<sup>1</sup> international network and its team of dedicated experts, DAHER is able to optimize its customers' supply and distribution costs.

As French participant in the EURTEAM European Alliance, DAHER has substantial purchasing leverage and is able to offer unique geographic coverage. EURTEAM also offers a comprehensive range of services dedicated to the chemical sector, including customs clearance, the organization of international transport, etc.

Moreover DAHER can support the sector's industrial groups by taking on full responsibility for managing upstream (supply) and downstream (distribution) flows, including procurement flows, order processing & tracking, stock management and distribution.

**With its engineering approach, its investment in the fleets that it makes available to industrial customers and – of critical importance - a global door-to-door offer, DAHER confirms its position as an expert partner in the nuclear and chemical markets.**

**For further information about GEPAR EXPO - [www.geparexpo.com](http://www.geparexpo.com)**

The first edition of the GEPAR EXPO, held at Lyon's International convention Centre from June 19 to 21, 2007, brings together all the players and activities involved in the design, production, transport and disposal of high risk products. Close to 2,500 visitors (from industry, research laboratories, production or storage centres, transport and logistics companies, etc.), attend this unique event in Europe entirely devoted to the subject of risk.

**For further information on DAHER – [www.daher.com](http://www.daher.com)**

DAHER is an equipment manufacturer that designs and produces equipment and services for very high technology industries. Specialised in global solutions that include industrial manufacturing and services, DAHER works in particular in the Aerospace, Defence, Nuclear and Automotive sectors.

Founded in 1863, DAHER is an exclusively family-run, independent international group, with nearly 5,000 employees and 12 international installations (4 in Western Europe, 3 in Eastern Europe, 2 in North America, 2 in Africa and 1 in Australia). In 2006, DAHER hit a turnover of 450 million Euros, representing an average annual growth of 15% over the last three years, and forecasts a turnover of around 550 million Euros for 2007.
