## Equipment and services supplier DAHER's aerospace division adopts comprehensive "Quality - Environment - Safety" programme

Equipment and services supplier DAHER's aerospace division is adopting a comprehensive "Quality - Environment - Safety" programme for the benefit of all those involved in the aerospace industry.

**DAHER Aerospace** has just been awarded two new certifications: **ISO 14001** and **OHSAS 18001**.

These certifications represent another step in DAHER's quest for continuous improvement in the fields of **safety and the environment** and show its determination to meet both regulatory requirements and the demands of its customers.

After a general audit in June, certification was confirmed in September and the certificates were formally awarded in October.

These certificates come in addition to the **quality certification** already obtained by DAHER Aerospace:

- **ISO 9001 and EN 9100** for design, industrial manufacturing (in France and Morocco) and installation on aircraft
- **ISO 9001 and EN 9120** for service activities

What is more, DAHER has already been awarded **specific accreditation from the DGAC, the French certification authority**:

- **PART 21G** certification for production of aerospace parts
- **PART 145** certification for aircraft maintenance.

All these certifications illustrate DAHER's comprehensive approach and its determination to meet its customers' needs by supporting them in the implementation of their own sustainable development programmes.

**For further information on DAHER – [www.daher.com](http://www.daher.com)**

DAHER is a European integrated equipment and services supplier, dedicated to Aerospace and other manufacturing industries.

In addition to Aerospace, DAHER specializes in three other sectors: Nuclear, Defence and Automotive, and is developing in three fields of expertise – manufacturing, services and transport – which enable it to offer a comprehensive package.

Founded in 1863, DAHER is an exclusively family-run, independent international group, with more than 5,000 employees and 12 international installations (4 in Western Europe, 3 in Eastern Europe, 2 in North America, 2 in Africa and 1 in Australia). DAHER has doubled in size over four years to reach an annual turnover of 530 million euros in 2007.

DAHER Aerospace specializes in three product lines for the aerospace industry: composite aerostructures, cabin comfort and services. Its industrial production activities are spread among four plants in France, in Saint Julien (Department 41), Luceau (72), St Hilaire (44) and Saint Nazaire (44), as well as one plant in Tangiers, Morocco and another in Nogales, Mexico. Service activities are performed at over thirty industrial sites across Europe.
