Daher is awarded a contract to manufacture the wing-to-body fairing for Gulfstream newest aircraft

Daher designs and manufactures the main landing gear doors on the G500 & G600 programs. With the signing of this new contract Daher now manufactures the wing-to-body fairing.

EBACE – Geneva (SWI), May 18, 2015 – Daher is proud to consolidate its position as a tier-1 supplier for the latest Gulfstream aircraft platforms, the G500 and G600. Daher will provide the wing-to-body fairing, a composite structure contributing to the aerodynamics of the aircraft.

Daher builds on its expertise to design and manufacture complex composite aerostructures

Daher has many years of experience in design and manufacturing of composite fairings for a large number of aircraft. This is one of the products for which Daher can offer turnkey solutions: from design and manufacturing, right through to installation on the aircraft at its customers' final assembly lines.

"With this new work package, Daher is more involved in the G500 and G600 programs. The renewed confidence of a customer like Gulfstream is the best proof of the quality of the solutions delivered by Daher. All our teams are very proud of this new success." explains Nicolas Orance, Senior Vice President of Daher's Aerospace & Defense Business Unit.

A new stage in Daher's development strategy in the US

Eight months after its first contract announcement with Gulfstream and two months after the opening of a new site in Pompano Beach, FL, this new contract sees Daher go one step further with its development of the US market.

"Daher is very committed to expand in the US market. It has over 40 years of presence in North America as an aircraft manufacturer, a fleet of more than 500 TBMs flying here, and a composite aerostructures plant located in Nogales, Mexico, to serve US aircraft OEMs. The renewed confidence from Gulfstream is encouraging us to accelerate the growth of our activities in the United States" added Didier Kayat, Deputy CEO of DAHER.

As of 2014, Daher employs 200 people and generates a turnover of \$200 million in North America.

About Daher - www.daher.com

Daher is an equipment manufacturer that develops Integrated Industrial Systems for aerospace and advanced technologies.

By linking its know-how in industrial manufacturing, product and process engineering, logistics and transport, and industrial services, Daher designs and develops value-added solutions for its industrial partners, who benefit from this convergence of industry and services. Daher has established itself as a leader in 5 fields of activity: aircraft manufacturer, aerostructures and systems, integrated logistics, nuclear services, and valves.

Daher posts turnover of nearly a billion euros, and its order book stands at around three and a half years of turnover. Driven by bold innovation ever since it was founded in 1863, Daher has established itself today as one of the major players of the 3rd industrial revolution.
