## – 2015 Paris Air Show –

### Daher: key aircraft manufacturer and equipment supplier at show

*Paris, June 8, 2015* – The Paris Air Show, to be held June 15-21, will be a chance for Daher to show off its "Aerospace & Defense" offer, which demonstrates the convergence between manufacture and services. Daher will have a bigger presence than ever in its three major roles: aircraft manufacturer, equipment supplier and top employer.

The TBM 900 will be presented at the Air Show for the first time, together with a demonstrator of the rear section of the Falcon 5X fuselage, for which Daher is responsible on behalf of Dassault Aviation. The manufacturer will also invite visitors to find out how Daher makes use of innovation, notably through additive manufacturing and virtual reality.

In addition, Daher will have a stand at the Jobs and Training Forum.

Daher is operating today in an environment undergoing major transformation, that of the **3<sup>rd</sup> industrial revolution**. This is marked in particular by two underlying trends: convergence between manufacturing and services, and the advent of the smart, connected factory of the future. Daher has been preparing this transformation for several years now and already offers Integrated Industrial Systems for aerospace and advanced technologies. The Paris Air Show therefore offers **Daher the chance to present its full "Aerospace & Defense" offer, rooted in this convergence between manufacturing and services and resolutely representative of the factory of the future.**

Visitors will be able to meet with Daher at the Air Show in three different settings:

- **As an equipment supplier, with the global presentation of its "Aerospace & Defense" offer**

**STAND B253 / HALL 2A**

#### **Aerostructures & Systems activity**

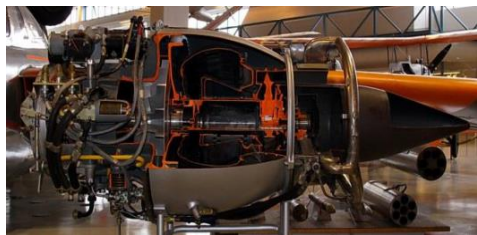

**Daher is a partner to major international aerospace and defense programs.**

From the design of basic parts to the production of fully equipped sections, 1400 aircraft with Daher equipment and systems were delivered last year and the company has registered numerous new contracts, including its first as a tier-1 supplier to an American aircraft manufacturer (Gulfstream).

#### **Focus on the show**

- ✓ **Exhibition of a demonstrator of the rear structure of the fuselage produced by Daher for the Falcon 5X** by Dassault Aviation. Daher has put its specialist experience in cutting-edge technologies, along with its assembly expertise, engineering know-how and its capacity to control the entire supply chain, to optimum effect to support Dassault Aviation.
- ✓ **Presentation of the TBM Final Assembly Line and aerostructure parts in virtual reality**  
The virtual reality cell, used with 3D glasses, creates interactive visual and audio simulations in a special environment to highlight errors in design or process before deployment. This technology can be applied at each phase of an industrial project, from design through to process optimization, training of staff, and production.

**Integrated logistics**

Over an industrial history spanning more than 150 years, Daher has developed a range of specific, tried-and-tested methodologies and tools to support its customers during large-scale operations: **transportation, logistics, industrial services, lead logistics & service provision.**

This year, this enabled Daher to become the sole logistics provider for Airbus Helicopters' four plants in Europe and logistics manager for Turbomeca's three French production sites.

- **As an aircraft manufacturer, with the 1<sup>st</sup> presentation of the TBM 900 at the Air Show**

**STATIC DISPLAY B4**

Daher manufactures the TBM, a family of six-seater turboprop business aircraft whose latest model is the TBM 900. With 64 orders issued, 2014 was the most successful year for the program in terms of sales.

**The TBM 900 will be presented by Daher for the first time at the Paris Air Show.**

- **As a leading employer, with a presence at the Jobs and Training Forum to share its career opportunities and recruit new talent**

**HALL CONCORDE 07**

-----  
**About Daher - [www.daher.com](http://www.daher.com)**

Daher is an equipment supplier, developing integrated industrial systems for aerospace and advanced technologies. By linking its know-how in industrial manufacturing, product and process engineering, logistics and transport, and industrial services, Daher designs and develops value-added solutions for its industrial partners, who benefit from this convergence of industry and services. Daher has established itself as a leader in 5 fields of activity: aircraft manufacturer, aerostructures and systems, integrated logistics, nuclear services, and valves.

Daher generates a turnover of nearly one billion euros, with an order book which corresponds to more than three years of turnover. Driven by bold innovation ever since it was founded in 1863, Daher has established itself today as one of the major players of the 3rd industrial revolution.
